### Research Letters

Chromosomal aberrations and sister-chromatid exchanges in tool and die workers (MTRL 0157) by V.F. Garry, R.L. Nelson, E.P. Whorton and J.K. Wiencke (U.S.A.) .....	1
Cytotoxic and genotoxic effects of extracellular generated singlet oxygen in human lymphocytes in vitro (MTRL 0160) by D. Decuyper-Debergh, J. Piette, C. Laurent and A. van de Vorst (Belgium) .....	11
Studies on the oxidation products from 2,4-diaminotoluene by hydrogen peroxide and their mutagenicities, II. (MTRL 0162) by T. Watanabe, M. Ono, T. Hirayama and S. Fukui (Japan) .....	15
No evidence of chromosomal instability in nevoid basal-cell carcinoma syndrome (MTRL 0163) by F. Sarto, D. Mazzotti, R. Tomanin, G.C. Corsi and A. Peserico (Italy) .....	21
Comparative study of sister-chromatid exchanges and chromosomal aberrations induced by airborne particulates from an urban and a highly industrialized location in human lymphocyte cultures (MTRL 0164) by W. Hadnagy, N.H. Seemayer, R. Tomingas and K. Ivanfy (F.R.G.) .....	27
Spontaneous revertants in modified <i>S. typhimurium</i> mutagenicity tests employing elevated numbers of the tester strain (MTRL 0165) by P.E. Georgiou, P.A. Blagden, L. Winsor and D.T. Williams (Canada) .....	33
Comment on the non-additivity of the mutagenic response of mixtures of nitrobenzo[a]pyrenes (MTRL 0166) by G. Löfroth (Sweden) .....	41
An adaptive response of <i>Vibrio cholerae</i> strain OGAWA 154 to furazolidone (MTRL 0167) by R. Bhattacharya (India) .....	43
Cell electroporation is a highly efficient method for introducing restriction endonucleases into cells (MTRL 0168) by R.A. Winegar, J.W. Phillips, J.H. Youngblom and W.F. Morgan (U.S.A.) .....	49
Effects of pH in the in vitro chromosomal aberration test (MTRL 0169) by T. Morita, Y. Watanabe, K. Takeda and K. Okumura (Japan) .....	55
Induction of CAD gene amplification by restriction endonucleases in V79,B7 Chinese hamster cells (MTRL 0170) by P. Cavolina, C. Agnese, A. Maddalena, G. Sciandrello and A. Di Leonardo (Italy) .....	61
The basal and the mutagen-induced levels of ADP-ribosyl transferase activity are not modified in Fanconi's anemia cells (MTRL 0171) by A.I. Scovassi, M. Stefanini, R. Izzo, P. Lagomarsini, U. Bertazzoni and E. Moustacchi (Italy and France) .....	65
Induction of micronuclei in pre-implantation rat embryos in vivo (MTRL 0172) by F. Ornaghi and E. Giavini (Italy) .....	71
Mutagenicity of nitro- and amino-substituted phenazines in <i>Salmonella typhimurium</i> (MTRL 0173) by T. Watanabe, Y. Hanasaki, T. Hirayama and S. Fukui (Japan) .....	75
The induction by ionizing radiation of chromosomal aberrations in rhesus monkey pre-meiotic germ cells: effects of dose rate and radiation quality (MTRL 0174) by P.P.W. van Buul (The Netherlands) .....	83
Formation of 8-hydroxydeoxyguanosine in DNA treated with fecapentaene-12 and -14 (MTRL 0175) by M. Shioya, K. Wakabayashi, K. Yamashita, M. Nagao and T. Sugimura (Japan) .....	91
Increased frequency of oxidant-mediated DNA strand breaks in mononuclear leucocytes exposed to activated neutrophils from cigarette smokers (MTRL 0176) by G. Schwalb and R. Anderson (South Africa) .....	95
Specificity of the interaction of furfural with DNA (MTRL 0178) by S.M. Hadi, Shahabuddin and A. Rehman (India) .....	101
An approach to the investigation of cancer in tool and die workers. I. Epidemiologic findings in a suspected cancer cluster among tool and die workers (MTRL 0179) by V.F. Garry, D.R. Jacobs Jr., J. Potter, R.A. Kreiger, D. Garland and M.R. Sinn (U.S.A.) .....	107
Chromosomal hypersensitivity in mutant MCN-151 mouse cells exposed to mitomycin C (MTRL 0177) by F. Rosselli and E. Moustacchi (France) .....	115

Effect of the orientation of nitro substituent on the bacterial mutagenicity of dinitrobenzo[e]pyrenes (MTRL 0180) by P.P. Fu, Y.-C. Ni, Y.-M. Zhang, R.H. Heflich, Y.-K. Wang and J.-S. Lai (U.S.A., Taiwan) .....	121
Comment on mutagenicity of diethyl sulfate in mice and on germ-cell mutagenicity testing (MTRL 0186) by W.L. Russell (U.S.A.) .....	127
The influence of $\alpha$ -tocopherol and pyritinol on oxidative DNA damage and lipid peroxidation in human lymphocytes (MTRL 0187) by J. Topinka, B. Binkova, R.J. Sram and A.N. Erin (Czechoslovakia, U.S.S.R.) .....	131
Influence of benzamide on killing and mutation of density-inhibited V79 cells by MNNG (MTRL 0188) by R. Ghosh (Datta) and S.B. Bhattacharjee (India) .....	137
The rat-liver carcinogen <i>N</i> -nitrosomorpholine initiates unscheduled DNA synthesis and induces micronuclei in the rat liver in vivo (MTRL 0181) by J. Ashby and P.A. Lefevre (Great Britain) .....	143
A genetic method to quantitate induced chromosome breaks using a mouse/human monochromosomal hybrid cell line: Identification of potential clastogenic agents (MTRL 0182) by R. Gudi, S.S. Sandhu and R.S. Athwal (U.S.A.) .....	149
Mutagenicity of 1-, 3- and 6-nitrosobenzo[a]pyrene in <i>Salmonella typhimurium</i> and Chinese hamster ovary cells (MTRL 0183) by R.H. Heflich, L.E. Unruh, J.R. Thornton-Manning, L.S. von Tungeln and P.P. Fu (U.S.A.) .....	157
Bioreduction of 4-nitroquinoline 1-oxide in dysplastic nevus syndrome fibroblasts (MTRL 0184) by R. Mirzayans, M. Sabour and M.C. Paterson (Canada) .....	165
Acentric chromosomal fragments and micronuclei: the time-displacement factor (MTRL 0185) by J.R.K. Savage (Great Britain) .....	171
Complete culture medium is better than low folate medium for detecting increased chromosome aberrations in smokers in 48-h lymphocyte cultures (MTRL 0189) by J.A. Reidy, H. Zhou, A.T.L. Chen, J.L. Annest and T.K. Welty (U.S.A.) .....	175
Mutagenicity of nitrofurantoin and furazolidone in Chinese hamster ovary cell strains (MTRL 0190) by N. Gao, Y.-C. Ni, J.R. Thornton-Manning, P.P. Fu and R.H. Heflich (U.S.A.) .....	181
The HLA-A mutation assay: Improved technique and normal results (MTRL 0191) by M.A. McCarron, A. Kutlaca and A.A. Morley (Australia) .....	189
<i>Contents, Vol. 225 (1989)</i> .....	195
